

ArtemiS SUITE
Signal Processing

Code 51704

ASP 704 MTS-RPC Conversion

MTS-RPC Conversion of ArtemiS SUITE enables the import and export of MTS-RPC files (Remote Parameter Control).

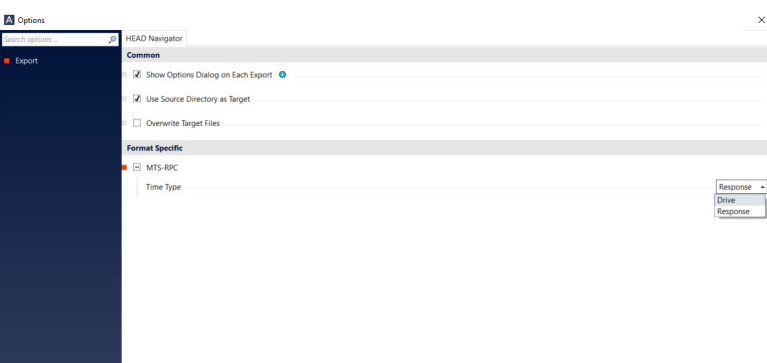

OVERVIEW

ASP 704 MTS-RPC Conversion

Code 51704

MTS-RPC Conversion enables the import and export of MTS-RPC files using the HEAD Navigator, Pool Projects, Automation Projects, and Standardized Test Projects.

MTS-RPC Conversion can be used to transfer 2D time data from a RPC-based software to ArtemiS SUITE, for example.

KEY FEATURES

- › Import and export:
 - › HEAD Navigator (included in APR 000)
 - › Automation Project (APR 050 is required)
- › Export:
 - › Pool Project (APR 010 is required)
 - › Standardized Test Project (APR 220 is required)
- › Import options:
 - › Import of 2D time-data (one abscissa) is supported
 - › All utilized channels will be written accordingly to a HDF file
- › Export options:
 - › Export of 2D time data (one abscissa) is supported
 - › Time data can be filtered and statistically processed before export
 - › Time type of the exported file can be set by user (Drive vs. Response)

Required: APR Framework (Code 50000)

and/or: HEAD System Integration and Extension (ASX) programming interfaces
